

RUN

www.vietnamdioramas.com

D Unit on ground almost finished. Needs the props some cleaning up, then airbrushing. Extra details added, including coiled communication cables, extra floor plate, outside radio antenna for ground unit radio, M60 "monkey sling", external gun mount covering, no cargo doors, right front pilots door removed, cracked right side glass, fuselage bullet holes, and windshield bullet holes. Two dead added and nurse added. This figure was converted from scrap parts, one off sculpting, using an MAIM bare female head and hair made from Procreate. The arm position may look odd, but she is poised to grab the lead ends of the stretcher within a few seconds, moving herself back as she pulling it in. As you can see from the other pictures, the stretcher party is within ten feet of the doorway.
