Their sacrifice will continue as many suffer the pain of wounds and the mental pain of combat that will never heal. Today there are many places where there is no freedom, only fear and repression. In our nation we continue to enjoy our rights and freedoms granted by our constitution - preserved and defended by our veterans, those men and women who go to war to insure our democratic way of life will continue. Freedom is not a God given right. As said many times before "Freedom Is Not Free". The price is high and our veterans have paid it - those who came home and those who didn't. Thank them and appreciate the gift of freedom.

NKD

Never Forget!
